Mixing strategy with inclusive intuitive designs

SUMMARY

Senior UX Designer with expertise in information architecture and a track record of aligning design strategy with business goals. Skilled at fostering cross-team collaboration and using AI to rapidly prototype concepts, driving stakeholder alignment and buy-in on solutions that grow revenue and client satisfaction.

EXPERIENCE

Cigna/Evernorth, Senior Product Designer Jun 2022 - Present

- Serve as Design Lead for a team of direct reports, providing mentorship, feedback, and career development to grow design talent.
- Lead strategy and prioritization planning for the design roadmap.
- Lead the end-to-end design process for 12 digital healthcare products, ensuring seamless user experiences across web and mobile platforms.
- Collaborated with cross-functional teams to translate business goals into user-centric design solutions.
- Conducted in-depth user research, usability testing, and data analysis to identify pain points and improve product performance.
- Advocated for design best practices and accessibility standards (WCAG) to create inclusive experiences for diverse user needs.
- Presented design strategies and insights to senior leadership, influencing business decisions and product roadmaps.

Servos, Lead Experience Designer Jul 2021 - Jun 2022

- Collaborated with cross-functional teams on pre-sales efforts, crafting compelling proposals to secure new business.
- Facilitated client workshops to gather requirements and craft seamless user experiences across responsive web and mobile platforms.
- Served as Design Lead and Experience Architect for government-facing B2B and B2C services, creating prototypes and directing implementation alongside Delivery teams.
- Contributed to end-to-end testing and deployment for high-profile ServiceNow enterprise implementations.
- Built scalable brand kits, design systems, and strategic guidelines to ensure consistency across internal and client-facing initiatives.

C+A Global, UX Researcher & Designer Sep 2020 - Jul 2021

- Worked across the full product lifecycle: conducting research, creating designs, and supporting development through launch.
- Designing B2C mobile applications for Healthcare Devices, Weather Generator Dashboard, Weather Station app, Nail Sticker Printing app, Automatic Pill Dispenser app, Photo Editing app, and more.
- Analyzed reviews, bug reports, and support feedback to prioritize improvements and plan new features.
- Led efforts to identify user experience problems through extensive research and thorough UX audits.
- Created and refined user flows and interfaces through continuous iterations and validation with users
- Partnered with R&D and developers to align on goals and deliverables for multiple product initiatives

KEY ACHIEVEMENTS

Contributed to a **324%** increase in conversion rates for members optimizing their prescription benefits, driving **significant savings on prescriptions** while delivering value to both clients and the business.

Increased member completion of the end-to-end pricing experience by **8%** through the teardown and redesign of the legacy pricing interface.
